NEW FUSION OF LIGHT

07-2022
DENMARK | FINLAND | FRANCE | ICELAND TYPE 3

Ergoline

THE NEW TOP MODEL

ACTIVATING LIGHT AND BEAUTY LIGHT - COMBINED FOR THE FIRST TIME.

The new top model from Ergoline combines the effects of blue Activating Light LEDs and red Beauty Light LEDs for the first time.

Blue Activating Light LEDs prepare the skin for tanning and intensify the directly visible tanning results. Red Beauty Light LEDs care for the skin during your tanning session and improve your tan even more. The blending of the two coordinated light spectra enables a particularly intensive and beautiful tan.

LED TECHNOLOGY FROM THE NUMBER 1 THE FUTURE DEVELOPED FURTHER

LATEST LED LIGHT TECHNOLOGIES FOR BEST EVER RESULTS.

The fusion of light spectra offers tanning results with simultaneous skincare. With Fusion Technology, Ergoline uses special high-performance LEDs with specially defined effective spectra to achieve results.

FUSION TECHNOLOGY: INTENSIVE TANNING RESULTS WITH SKINCARE

ACTIVATING LIGHT (BLUE LIGHT)

- Prepares the skin for tanning
- Activates the tanning process
- Fast, intensive direct pigmentation

BEAUTY LIGHT (RED LIGHT)

- Skincare
- Improved blood circulation
- Optimized oxygen supply
- Naturally beautiful tan

FUSION TECHNOLOGY (ACTIVATING LIGHT + BEAUTY LIGHT)

- Perfect blending of light spectra
- Combines the effects of Beauty Light and Activating Light
- Intensive, directly visible tan with skin care

High-performance LEDs enable an utilization of the various light spectra.

SPECTRA THE NEW TANNING EXPERIENCE

Power-saving and gentle to the skin

Conventional high-pressure facials generate UV as well as a high dose of infrared radiation. Too much infrared radiation leads to redness and skin tension after sunbathing. With Ergoline Spectra, only the desired light spectra are generated. UVA LEDs produce an instantly visible tan. Spaghetti lamps supplement the light spectrum with UVB. The spectrum makes tanning exceptionally gentle and pleasant.

Since only the desired light spectra are generated, Spectra reduces power consumption by around 90 % compared to conventional facial tanners. The perfect antidote to rising energy prices.

COMPLETE COMFORT

SOFT

Tanning with Spectra is more gentle to the skin than any other conventional sunbed using high pressure technology, thanks to the reduction in infrared radiation. For a beautiful natural tan, eliminating skin stress and redness.

GENTLE

Too much infrared breaks down collagen and is a factor in skin aging. The lower heat development protects the skin and makes the Beauty Light more efficient.

QUIET

Reduced ventilation noise, particularly in the facial area, ensures a quieter tanning session. This enables the whole Spectra tanning experience to be quieter, calmer and even more relaxing.

COMFORTABLE

Spectra is the new Prestige series benchmark for quiet and gentle yet supremely effective tanning. Even the unpleasant shutdown of the high pressure lamps at the end of the tanning session is now a thing of the past. Spectra. A completely new tanning experience.

OPTIMISED TAN

CONSISTENT RESULTS

The Spectra LED technology enables a more homogenous distribution of sunlight eliminating hotspots. For an even and effective tan over the entire facial area.

OPTIMISED SPECTRUM OF EFFICACY

The optimised spectrum of UVA LEDs and UVB spaghetti-lamps improves tanning results without the need for higher UV output.

CONSISTENT HIGH PERFORMANCE

Say good-bye to reduced performance in aging high pressure facial lamps. The tanning performance of the high-power LEDs remains virtually consistent throughout the entire lifetime.

AN INVESTMENT WHICH PAYS OFF

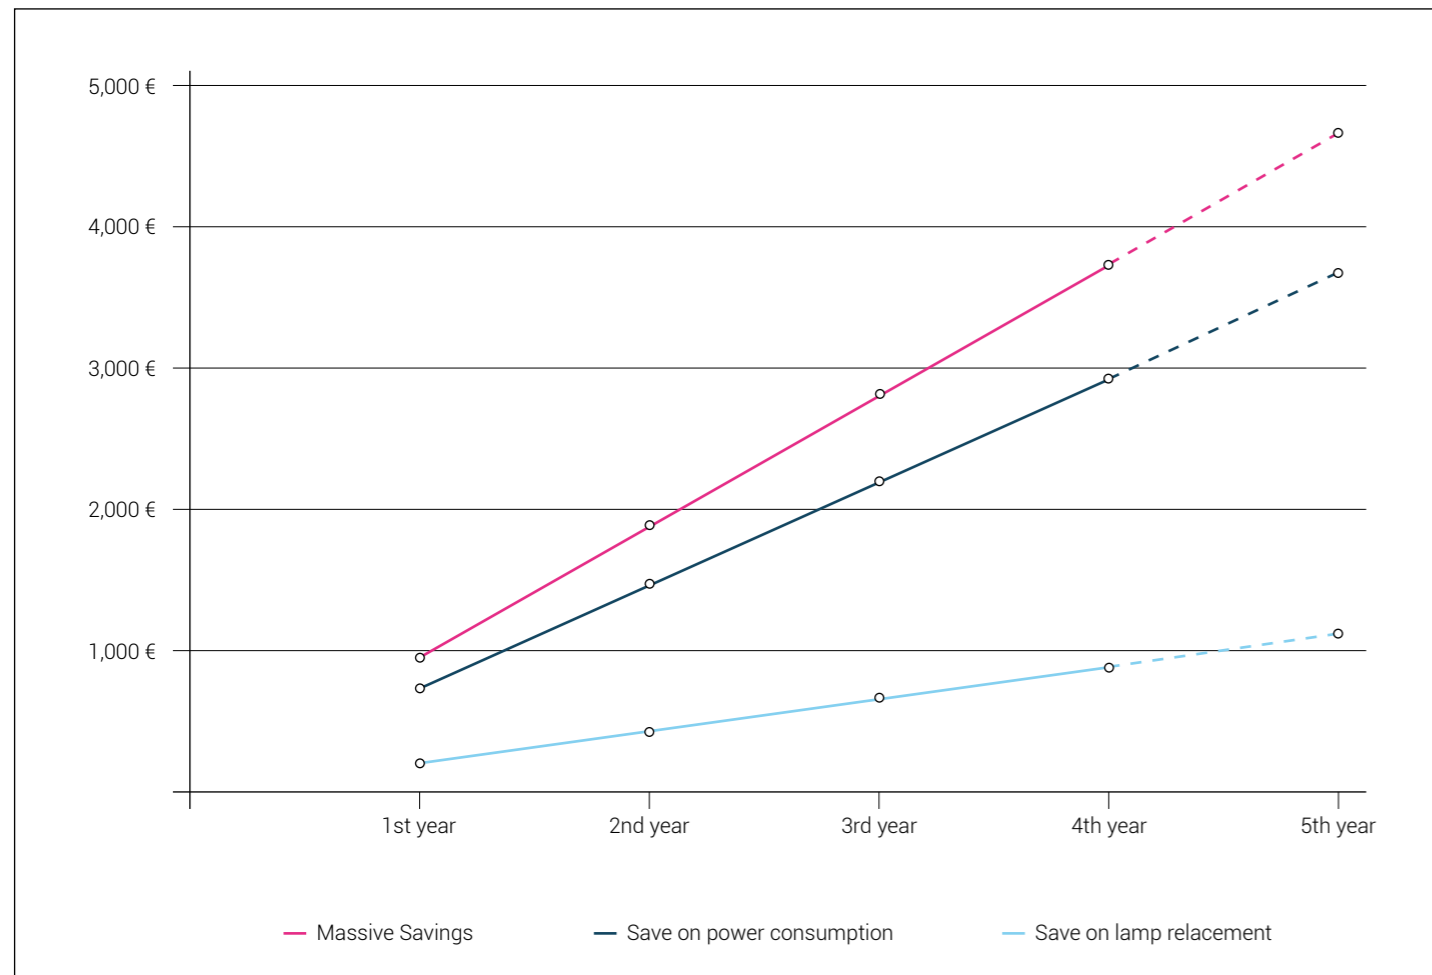

POWER CONSUMPTION REDUCED BY 2,000 WATTS SAVING YOU MONEY

Ergoline's new Spectra LED technology generates the desired light spectra for delivering optimum tanning results but with a 2,000 watts reduction in power consumption compared to conventional 420 watt facials. This represents a saving of 17 cents per 20-minutes tanning session, using an average price of 0.25 Euro per kW. With, say, 12 customers a day, this represents a saving of 730 Euros a year. That equates to a saving of over 2,900 Euros during a 4-year lease. Under certain circumstances, additional consumption peaks can be reduced in the studio which can reduce electricity costs even further. With electricity prices continuing to rise, the savings will significantly increase.

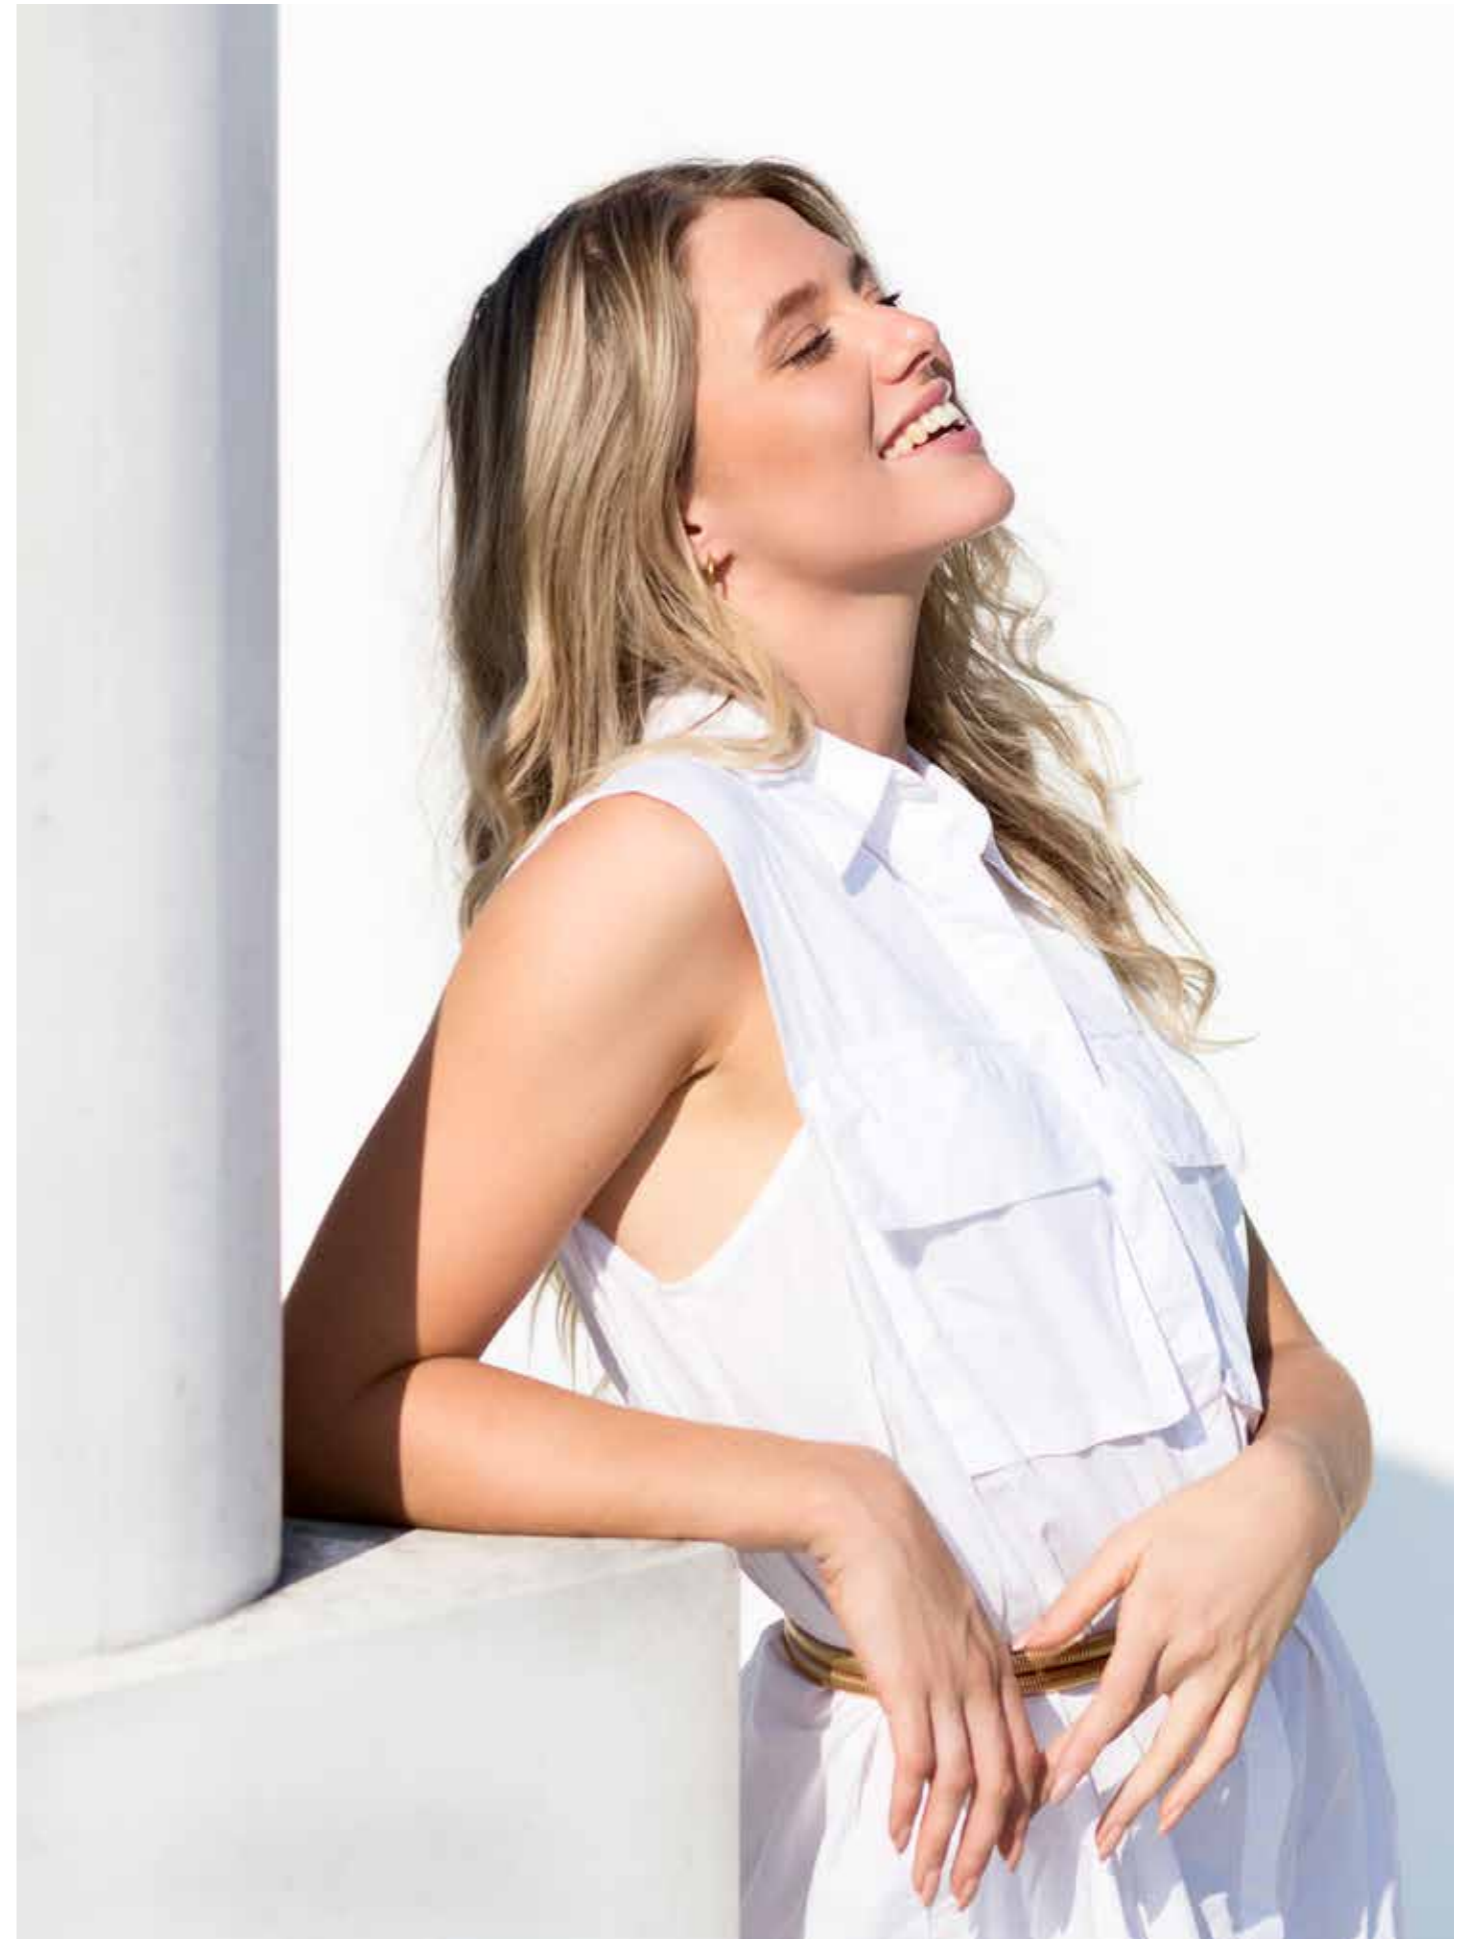

NEVER CHANGE HIGH PRESSURE LAMPS AGAIN

Conventional high pressure lamps must be replaced every 800 hours, as there is a significant drop in performance after that time. Thanks to an intelligent cooling system, the high performance LEDs offer a significantly longer lifetime without any noticeable loss in performance. With Spectra, changing high pressure lamps becomes a thing of the past. With an average of 12 customers a day, this equates to a saving of around 900 Euros during a 4-year leasing period (excluding any labour costs).

SAVE MONEY OVER THE LEASE TERM

Thanks to the reduced power consumption and elimination of the need to replace lamps, Spectra can save you approximately 3,800 Euros in the first 4 years. And with rising electricity prices, the potential to save more is even greater. In addition to these savings, the innovative Spectra technology can be marketed to generate additional salon revenue. That has to be good for salon profits!

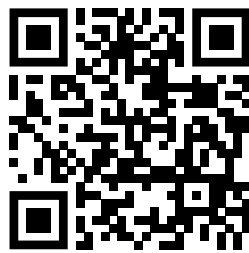

AN UNIQUE TANNING EXPERIENCE

THE NEW ERGOLINE TOP MODEL

- **FUSION TECHNOLOGY**
Blending of Activating Light & Beauty Light.
- **ORIGINAL ERGOLINE LED TECHNOLOGY**
High-performance LEDs for optimum results.
- **LED SHOULDER TAN**
All-over beautiful tan and skincare.
- **PERSONAL SUNSTYLE**
Selectable UV intensity, from gentle to intense.
- **EXTERIOR TOUCH CONTROL**
With eye-catching video function.
- **INTERIOR TOUCH CONTROL**
Intuitive operation while tanning.
- **3-ZONE VENTILATION WITH CLIMATRONIC PLUS**
Perfect climate - from head to toe.
- **CINEMATIC SOUND**
Bluetooth® Connect included.
- **AQUA FRESH AND AROMA**
Perfect refreshment while tanning.
- **NFC CONNECT**
Easy saving of comfort settings.
- **PROFESSIONAL SET-UP**
More setting options and easy service.
- **ELECTRONIC VOICE ASSISTANT**
E.V.A. - the voice control system from Ergoline.
